*SMART*till® Solution Suite

| Existing POS Software | *SMART*till® Connect *(middleware)* | *SMART*till® Solution *(hardware)* | CurrentSee® Enterprise *(software)* | Data Reporting *(business intelligence)* |

| Free standing solution for quick integration | *SMART*till® Connect can be sold separately | Available to use with Windows, iOS and Android based POS |

SMARTtill® Connect

Through SMARTtill® Connect, quick deployment and integration with existing POS systems is made easy.

SMARTtill® Connect enables you to gather transaction information from any Windows based POS system, allowing fast transaction integration on a wide variety of POS systems.

It provides menu access to special transactions used for items like cash top ups and cash lifts. This functionality helps to provide a complete transaction history for all cash movements and aides in cash loss investigations.

SMARTtill® Connect utilizes industry standard technology to capture POS transaction information without modification of the POS software. This can greatly reduce integration time and cost.

CurrentSee® Enterprise

The SMARTtill® Solution has built-in intelligence that integrates with POS software and communicates with a cash management software application called CurrentSee® Enterprise.

CurrentSee® Enterprise is a cloud-based reporting and data analytics software solution that can track and monitor your cash handling activities and cash performance in conjunction with the SMARTtill Solution® in real-time, allowing you to be proactive in cash handling operations, to streamline processes, analyze cash losses proficiently and obtain greater detail and insight.

How to get started:
