*SMART*till Solution®

460 ST2 Flip Lid (139) *SMART*till Solution®

Achieve Simplified Cash Handling

Cash Management Solution

The *SMART*till Solution® is a new revolution in cash management, enabling retailers to reduce cash losses, reduce the cost of cash handling, and improve in-store productivity. The *SMART*till Solution® is an innovative cash management system suitable wherever cash is transacted.

The *SMART*till Intelligent Cash Drawer captures, in real-time, all cash activity at its location and reconciles to sales made. This information is collected without affecting transaction time or interrupting the retail transaction. The *SMART*till Solution® can be integrated with your PoS hardware/ PoS application.

The data from the *SMART*till Units can be populated into any suitable database and used to support intelligent cash management to enable real-time cash visibility at the PoS. This can be via new or existing back office systems. Examples of the type of information for each *SMART*till Unit, includes; current cash float value; change levels compared to an optimum level; change top up requirements; value of change added; various alerts for cash lifts; cash errors; and discrepancy data by transaction, shift, cashier, time and date.

Operations

– Eradicate manual cash till counts and reduce cash loss investigation time

– Redeploy labour for an improved shopping experience

Loss Prevention

– Full cash transaction audit trail

– Ability to integrate CCTV to pinpoint discrepancies
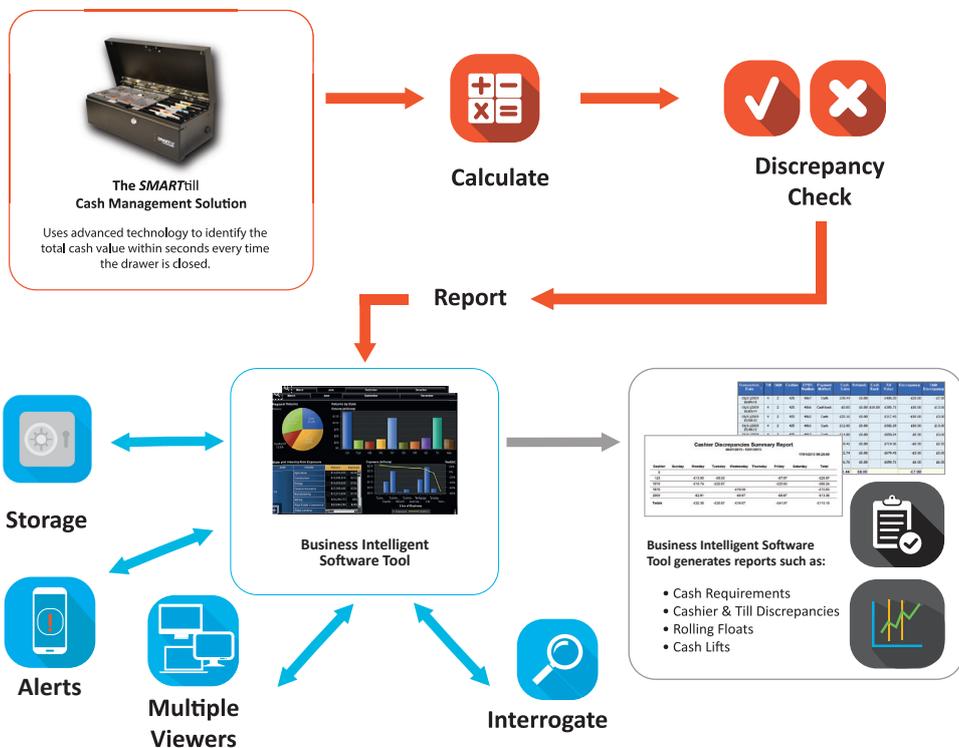

– Reduce cash losses by up to 90%

Data Analytics

– Security alerts on cash transaction errors, lifts, top ups, and CIT pick ups

– Predictive analytics; cashier, lane and store performance data

Treasury

– Reduce cash in transit (CIT) fees
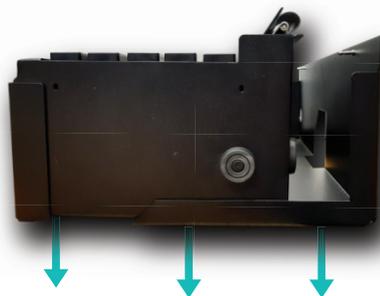

– Reinvest your 'dead' cash

The SMARTtill Cash Management Solution

Uses advanced technology to identify the total cash value within seconds every time the drawer is closed.
