

European Product Catalogue for General Application Cash Drawers

Economical Cash Drawers

APG's Entry Level Cash Drawers, ECD, are a range of cost effective, highly functional cash drawers that offer excellent value for money. The ECD range is perfectly suited for the small to medium retailer in a variety of sectors including hospitality and general retail where a good performing cash drawer is appreciated.

500,000 Transactions

1 Year Warranty

**APG Cash Drawer offers solutions built to fit your mobile environment.
We offer Bluetooth, Ethernet (wireless and wired), USB, and printer driven interfaces built for mPOS.**

BluePRO® Bluetooth Enabled Cash Drawers

The 510 BluePRO® Bluetooth External Device connects a low-cost, printer-kick cash drawer and pairs it with a mobile device. By creating a one-to-one relationship, retailers can now wirelessly synchronize and transfer data between a mobile device and the cash drawer. The BluePRO® Bluetooth Device achieves proximity when the mobile device comes within limited range of the drawer. The BluePRO® Bluetooth External Device is MFi certified for iPhone®, iPod®, and iPad®.

NetPRO® Cash Drawers for Ethernet Networks

APG's cash drawers are now available with Ethernet connectivity transforming the traditional Host/Peripheral model to a POS architecture design so placing the cash drawer into the client/server model of Ethernet-enabled equipment. Connecting over Wired Ethernet (including PoE) or Wireless LAN, NetPRO® enabled cash drawers communicate with clients across the network acting on their requests and capturing activities; expected and unexpected. Predefined events and triggers are used to log all cash drawer activity as well as initiating broadcast alerts to other devices such as SMS or email servers or invoking other network devices such as CCTV camera activation. Bar-code claiming, hand shaking and options of two-Level TLS-PSK Encryption ensure NetPRO® enabled cash drawers cover all aspects of client server security.

Stratis Tablet Holder

Designed for retailers who are installing mobile and/or Thin (Thinbility) iPad® based point of sale applications, the Stratis Tablet Holder enables a tablet to seamlessly slide over to the customer facing side for signature approvals. Magnetic base keeps the tablet holder firmly in place on top of the cash drawer. Adjustable tablet holder fits tablets between 16.9 cm and 21.5 cm.

USB Cash Drawer

Model 554A/854 cash drawers provide a convenient, cost-effective solution for the USB port.
