A unique solution for cash processing directly at the point of collection

Cash management has never been easier: cash movement checks are available at any time, eliminating the need to manually count the contents of a cash drawer. Consolidate your cash float across all operators, open and close tills without wasting time, and draw up real-time reports at shop level – or even across several shops!

smarttill®

Easy to install, easy to use, increased efficiency, real savings.

*Example of a dashboard configuration.

Automatic Counting

Instantly counts cash every time the cash drawer is closed, eliminating the need for time-consuming manual counting.

Checking Discrepancies

In the event of checkout discrepancies, our system generates the appropriate notifications, reducing both human error and the risk of theft.

Process Optimization

smarttill® also simplifies all other cash processing operations, such as cash deposits and withdrawals.

Back-office software and reporting

Real-time access to all your transactions and cash movements at shop or multi-store level. Our back-office software generates powerful reports for comprehensive monitoring and proactive cash management to enable informed decision-making.
