

CONNECTED DRAWERS FOR MOBILE AND SECURE POS

apg® offers a variety of cash drawers equipped with a ShareTill® ethernet connection for cash drawer control, creating a dynamic and secure POS.

Utilizing both NetPRO(R) and BluePRO(R) technologies, ShareTill (R) comes with wired and wireless ethernet, and also comes with a Bluetooth interface.

The drawer can be easily shared by multiple POS handheld devices, allowing customers to pay anywhere in the store, reducing the need to queue at fixed checkout points and resulting in a faster and more comfortable shopping experience.

For LP professionals and Store Management, the ShareTill(R)-equipped cash drawer adds a layer of security and helps to reduce loss. Real-time monitoring and logging of transactions and time-based usage data such as manual openings, POS identification and unusually long drawer open times are recorded.

ShareTill®-equipped cash drawers also offer an option to send security alerts to other devices on the network, such as CCTV recording activation and SMS alerts for managers.

BENEFITS OF USING AN ETHERNET- CONNECTED DRAWER:

GREATER CHECKOUT EFFICIENCY

- ✓ Reduced waiting times as multiple mPOS devices can be used with one cash drawer
- ✓ ShareTill(R) cash drawers can be opened directly via the store POS/mPOS application and have a barcode on the front of the drawer which may be scanned for proximity control.

INTEGRATION MADE EASY

- ✓ Quick and easy integration into LAN and WLAN environments
- ✓ Direct communication with various mPOS devices for greater flexibility

ENHANCED SECURITY AND CONTROL

- ✓ Real-time monitoring of transactions and time-based usage data such as manual openings, POS identification and unusually long drawer open times
- ✓ Option to send security alerts to other devices on the network, as well as CCTV recording activation and SMS alerts for managers
- ✓ TLS and HTTPS encryption for communication and data security

To upgrade existing hardware, the ShareTill Adapter enables any apg Series 320 Interface (24V) cash drawer to be converted into a network-connected drawer without the need for replacement.

apg® offers a range of Cash Drawers equipped with a ShareTill® interface to be fully compatible with Mobile POS Solutions.

Our ShareTill®-enabled cash drawers are available with a USB power adapter and PoE
